PROFESSIONAL SUMMARY

Passionate Computer Science undergraduate specializing in Data Science, with strong hands-on experience in Python, Machine Learning, and backend development. Built real-world projects including an ML-powered energy prediction system and a full-stack API platform. Certified in RPA and CRM automation by UiPath and Salesforce. Founded and directed two student tech communities and thrive in collaborative, problem-solving environments. Eager to contribute to a high-impact team as a data science or software development intern.

EDUCATION

B.Tech in Computer Science and Engineering (Data Science) 2023 - 2027 (Expected)

Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal | JNTU-A, Anantapur

Score: 8.94 CGPA

Intermediate (MPC) 2021 - 2023

Narayana Junior College, Nandyal | Board of Intermediate Studies, Andhra Pradesh

Score: 95.8%

Secondary School Certificate (SSC) 2021

Sri Ravindra High School, Nandyal | Board of Secondary School Certificate, Andhra Pradesh

Score: 100%

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, HTML, CSS

Frontend: React.js, Tailwind CSS

Backend and APIs: Flask, REST APIs, SQL

Machine Learning: scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Plotly

Databases: MySQL, SQLite, PostgreSQL

Tools and Platforms: Git, GitHub, Streamlit, Jupyter Notebook, VS Code, Google Colab

Automation and CRM: UiPath RPA, Salesforce Agentforce

PROJECTS

GreenPulse - Electricity Consumption Analysis and Prediction | Tech Stack: *Python, Flask, scikit-learn, SQLite, JavaScript, HTML, CSS* | [View on GitHub](#)

- Developed an end-to-end data pipeline to collect, clean, and analyze household electricity usage data, identifying consumption patterns across time and seasonal trends.
- Trained and evaluated regression models including Random Forest, XGBoost, and Linear Regression to forecast daily power consumption, achieving 88% prediction accuracy on test data.
- Created visual dashboards to communicate energy optimization insights and modeled a potential 15-20% reduction in peak-hour usage through behavioral recommendations.

SQL Spark - Interactive SQL Hackathon Platform | Tech Stack: *React.js, JavaScript, Python, PostgreSQL, Tailwind CSS, HTML, CSS*

- Architected a full-stack backend platform to host SQL hackathons, supporting simultaneous multi-user participation with isolated query evaluation environments.
- Implemented secure authentication, submission handling, and systematized scoring logic to enable real-time SQL query validation against expected outputs.
- Engineered a scalable evaluation engine capable of processing 50+ concurrent submissions with consistent response times under load.

Hotel Staffing Planner - ML Based Decision Support System | Tech Stack: *Python, Streamlit, Pandas, NumPy, scikit-learn, Plotly* | [View on GitHub](#)

- Developed an ML-based decision support system to forecast hotel occupancy and optimize staffing requirements using predictive modeling and demand analysis.
- Designed a rule-based engine using Python and scikit-learn to allocate staff based on predicted occupancy, industry ratios, and dynamic cost estimation for budgeting.
- Built interactive dashboards using Streamlit and Plotly to visualize occupancy trends, staffing needs, and operational insights for hotel management decisions.

Fair Invigilation Assigner - Exam Duty Scheduler | Tech Stack: *React.js, JavaScript, Python, Java, Tailwind CSS, HTML, CSS*
 | [View on GitHub](#)

- Built an automated invigilation assignment system that eliminates departmental conflicts by ensuring no faculty member invigilates exams from their own department.
- Implemented a constraint-based scheduling algorithm in Python and Java to equitably distribute exam duties across available faculty while enforcing all conflict rules.
- Designed a web interface using HTML and CSS for administrators to input faculty availability and exam schedules, instantly generating conflict-free duty rosters.

CERTIFICATIONS

Automation Business Analyst Associate - UiPath

January 2026

Agentforce Specialist - Salesforce

December 2025

ACHIEVEMENTS, LEADERSHIP AND ACTIVITIES

- Club Lead, Yuga Spark Hackathon Club — Organized and managed college-level hackathons.
- Community Lead, DataVerse — Founded and directed a data science community with over 50 active members, conducting workshops on Python, ML, and data analysis.
- Secured second place in college-level Data Drive Interview Preparation Contest.
- Achieved second place in college-level Poster Presentation, Department of CSE Data Science, RGM CET.
- Won third place in department-level Coding Contest.
- Awarded Special Prize at the 3-Level Mathematics Competition held by Nandyal Association of Mathematics Teachers.
